TITLE	[Holding Power and Graduates. Kentucky Public and Non-Public High Schools. Fourteenth Annual Report.]
INSTITUTION	Kentucky State Dept. of Education, Frankfort. Div. of Educational Research.
PUB DATE	Jan 70
NOTE	76p.
EDRS PRICE	EDRS Price MF-$0.65 HC-$3.29
DESCRIPTORS	Comparative Analysis, Dropout Rate, *Graduate Surveys, *High Schools, Population Distribution, Population Growth, Program Evaluation, *Rural Areas, School Demography, *School Holding Power, *Vocational Followup
IDENTIFIERS	*Kentucky

ABSTRACT

In this fourteenth annual report in the series of bulletins on the holding power and graduates of Kentucky public and nonpublic high schools, an overview of a 10-year period (1959-1969) is presented in addition to the usual analysis of data for the graduating class of 1969. Comparative data are presented on the holding power of Kentucky schools, Kentucky births, and whereabouts and employment status of the 42,877 graduates of Kentucky schools. Ten charts and 14 tables are used to explain the current data (Part I) and the trends and other related data (Part II). The data are organized on a statewide, regional, and individual school basis. A related document is ED 036 368. (AN)

FOREWORD

I am pleased to make available to the schools of Kentucky and to the public in general the fourteenth annual report in a series starting in 1956 on holding power and whereabouts of graduates of Kentucky high schools. While largely quantitative in nature, it is believed that the continuing study of the many factors influencing holding power will help to supply a key dimension for evaluation of educational outcomes -- the ultimate measure of a good school.

The comparative analysis of the data relating to the class of 1969 in terms of the class of 1959 in particular provides much tangible evidence of the continuing progress of secondary education in the decade of the Sixties. The growth has been significant and uninterrupted. The birth rate showing a gradual decline since its peak in 1947 has been largely compensated for by increased holding power. This trend continues to move upward at approximately one per cent per year. A survival ratio of 60.1 per cent from the 9th grade produced 26,679 graduates in 1959. A current ratio of 69.2, up 9.1 per cent from 1959, produced 42,877 graduates in 1969. Of the net increase of 16,198 graduates from 1959 to 1969, 5,636 may be attributed to increased holding power and, 10,562 to increased ninth grade enrollment.

The accommodation of record elementary and secondary enrollments during the decade of the Sixties, under seemingly insurmountable odds in many school districts, is only a part of the true measure of gains in education under the State's Foundation Program. It is hoped that this bulletin will be helpful to you in interpreting education's many facets of growth to date and its great expectations for the Seventies. Your comments and suggestions for future releases will be appreciated

Wendell P. Butler

Wendell P. Butler
Superintendent of Public Instruction

ACKNOWLEDGEMENTS

A generous amount of credit for this fourteenth report of a continuing series on holding power and whereabouts of graduates belongs to the high school principals of Kentucky and the several divisions in the Department of Education that collect, analyze, and report pupil data. Special recognition is due the Committee on Data Bank Development and the division of Statistical Services and Computer Services for the first computerized version of an instant retrieval data system and the sharing of preliminary graduate data for this report.

Special acknowledgement is also extended to the Bureau of Instruction; in particular, D. C. Anderson, director, Division of Elementary and Secondary Education and members of his staff for cooperation and assistance in providing usable data. Grateful appreciation is also expressed to the Bureau of Pupil Personnel Services, especially Lee Tyler, director and Lois Johnson, principal clerk in the Division of Pupil Personnel Attendance and Accounting. Reports from this division each year make possible the analysis, consolidation, and verification of much common pupil data submitted in separate reports and on different reporting schedules.

Finally special thanks go to Research office staff members--Estill Davidson, for supervision of the project, and Isabel Triplett who assumed major responsibility for organizing and typing the report with assistance from Brenda O'Brien on special sections.

INTRODUCTION

The fourteenth annual report in the series of bulletins on Holding Power and Graduates of Kentucky High Schools has the enlarged purpose of providing an overview of a ten year period of growth (1959-69) in addition to presenting the usual analysis of data for the graduating class of 1969.

In the 1956-57 school year the full financing of the State's Foundation Program Law, enacted in 1954, marked the beginning of a new era in public education in Kentucky. While there are many dimensions of a comprehensive state-local-federal plan for providing full educational opportunity for children and youth, it is generally agreed that the ultimate criterion of adequacy is the quality and quantity of educational outcomes made possible through its operation. Using the last year of the decade of the Fifties (1959) and the last year of the decade of the Sixties (1969), the following comparisons point up for one measure only the ten-year growth and expansion of the high school program in Kentucky.

> The increase in the number of high school graduates for the Class of 1968 as compared to the Class of 1959 is 16,198 or 60.7 per cent.
>
> The increase in births in the corresponding years 1951 and 1952 (Class of 1969) as compared to 1941 and 1942 (Class of 1959) was 19,007 or 14.7 per cent.
>
> The percentage of all graduates in 1959 in terms of total ninth grade enrollment four years earlier was 60.1 per cent. The comparable holding power figure for the Class of 1969 is 69.2 per cent.
>
> The increase in holding power from the ninth grade through graduation is 9.1 per cent or an increase of approximately 0.9 per cent per year for the ten year period, 1959-69.
>
> The increase of graduates in the Class of 1969 over the Class of 1959, directly attributable to increased holding power is 5,636 or 34.8 per cent.

The number of complete public high schools with graduating classes was decreased from 412 in 1959 to 303 in 1969--a decrease of 109 schools or 26.5 per cent.

The number of complete public high schools, having a graduating class of 100 or more increased from 64 public schools, or 16.3 per cent in 1960, to 142 high schools, or 46.9 per cent in 1969. (See Tables 8 and 9)

The number of complete public high schools in 1960 with graduating classes less than 30 in size was 112, or 28.5 per cent of total schools; in 1969, there were 22 schools, or 7.3 per cent of total schools. (Tables 8 and 9)

In 1960, the 64 high schools with graduating classes of 100 or more had enrolled 43.9 per cent of total ninth grade enrollment four years earlier, produced 43.6 per cent of total graduates, and reported 49.6 per cent enrolling in college in the fall term following graduation. (See Table 8)

In 1969, the 142 public high schools with graduating classes of 100 or more had enrolled 75.0 per cent of total ninth grade four years earlier, produced 75.8 per cent of all graduates, and reported 72.8 per cent of total graduates enrolling in college in the Fall of 1969. (See Table 9)

A comparison of survival ratios in all Kentucky high schools for 1959 and 1969 reveals the following grade level changes:

	Kentucky Survival Ratios Per 1,000		
Grade 1959	1959	1969	Change
Nine	1,000	1,000	--
Ten	852	901	+ 49
Eleven	723	800	+ 77
Twelve	634	725	+ 91
Graduates	601	692	+ 91

Generally comparable national retention rates[1] for 1959 and 1968 are as follows:

	Survival Ratios Per 1,000		
Grade	1959	1968	Change
Nine	1,000	1,000	--
Ten	935	960	+ 25
Eleven	826	883	+ 57
Twelve	725	812	+ 87
Graduates	687	746	+ 59

1. Derived data Source: Digest of Educational Statistics, 1968 Edition. U. S. Office of Education, p. 7. (latest data available)

A comparison of Whereabouts of Graduates of all Kentucky high schools, 1959 and 1968, reveals the following changes in an eleven-year span in the standard categories for which principals provide data:[1]

	1959	1969	Change	% Change
College or University	9,337	19,374	+ 10,037	+ 107.5
Trade, Technical, Nursing School	1,079	3,806	+ 1,885	+ 98.1
Business School	842			
Sales or Office	3,534			
Farming	1,105	11,834	+ 4,721	+ 66.4
Factory or Trade	2,474			
Other Employment Including Military	2,437	1,336	- 1,101	- 45.2
Not Employed	4,301	3,416	- 885	- 20.6
Unknown	1,768	2,944	+ 1,176	+ 66.5
Other	--	167	--	--
Total	26,679	42,877	+ 16,198	+ 60.7

In the Fall of 1959, 11,258 or 42.2 per cent of June graduates were reported entering a formal program of education beyond the high school. In the Fall of 1969, principals reported 23,180 or 54.1 per cent of the 1969 graduates enrolled in college or university, trade, technical, nursing school or business school.

A graphic portrayal of the growth pattern is shown on the following facing pages.

1. Revision of Principal's Annual Report in 1966 resulted in changes in categories reported on by principals which limits the comparability of items to broad approximations except for "college or university."

Source and Interpretation of Data

There are two primary sources of data on public high school graduates: the principal's annual report and the superintendent's end-of-the-year report. Statistical data on number of graduates in the principal's report in October may vary from end-of-year enrollment data in the statistical report of the superintendent submitted at the close of the school year on June 30. The data for graduates of public school districts are published in the Biennial Report of the State Superintendent of Public Instruction. The latter report includes graduates of public school districts only whereas this report accounts for all graduates of public and non-public high schools in the state.

A further precaution is necessary in distinguishing between "holding power" as defined in this report and school dropouts. The method of determining retention rates follows the national pattern. In this bulletin series, rates for the ninth grade through high school graduation are based on enrollments in successive grades in successive years of all public and non-public schools. The data at hand limit the base year to the ninth grade.

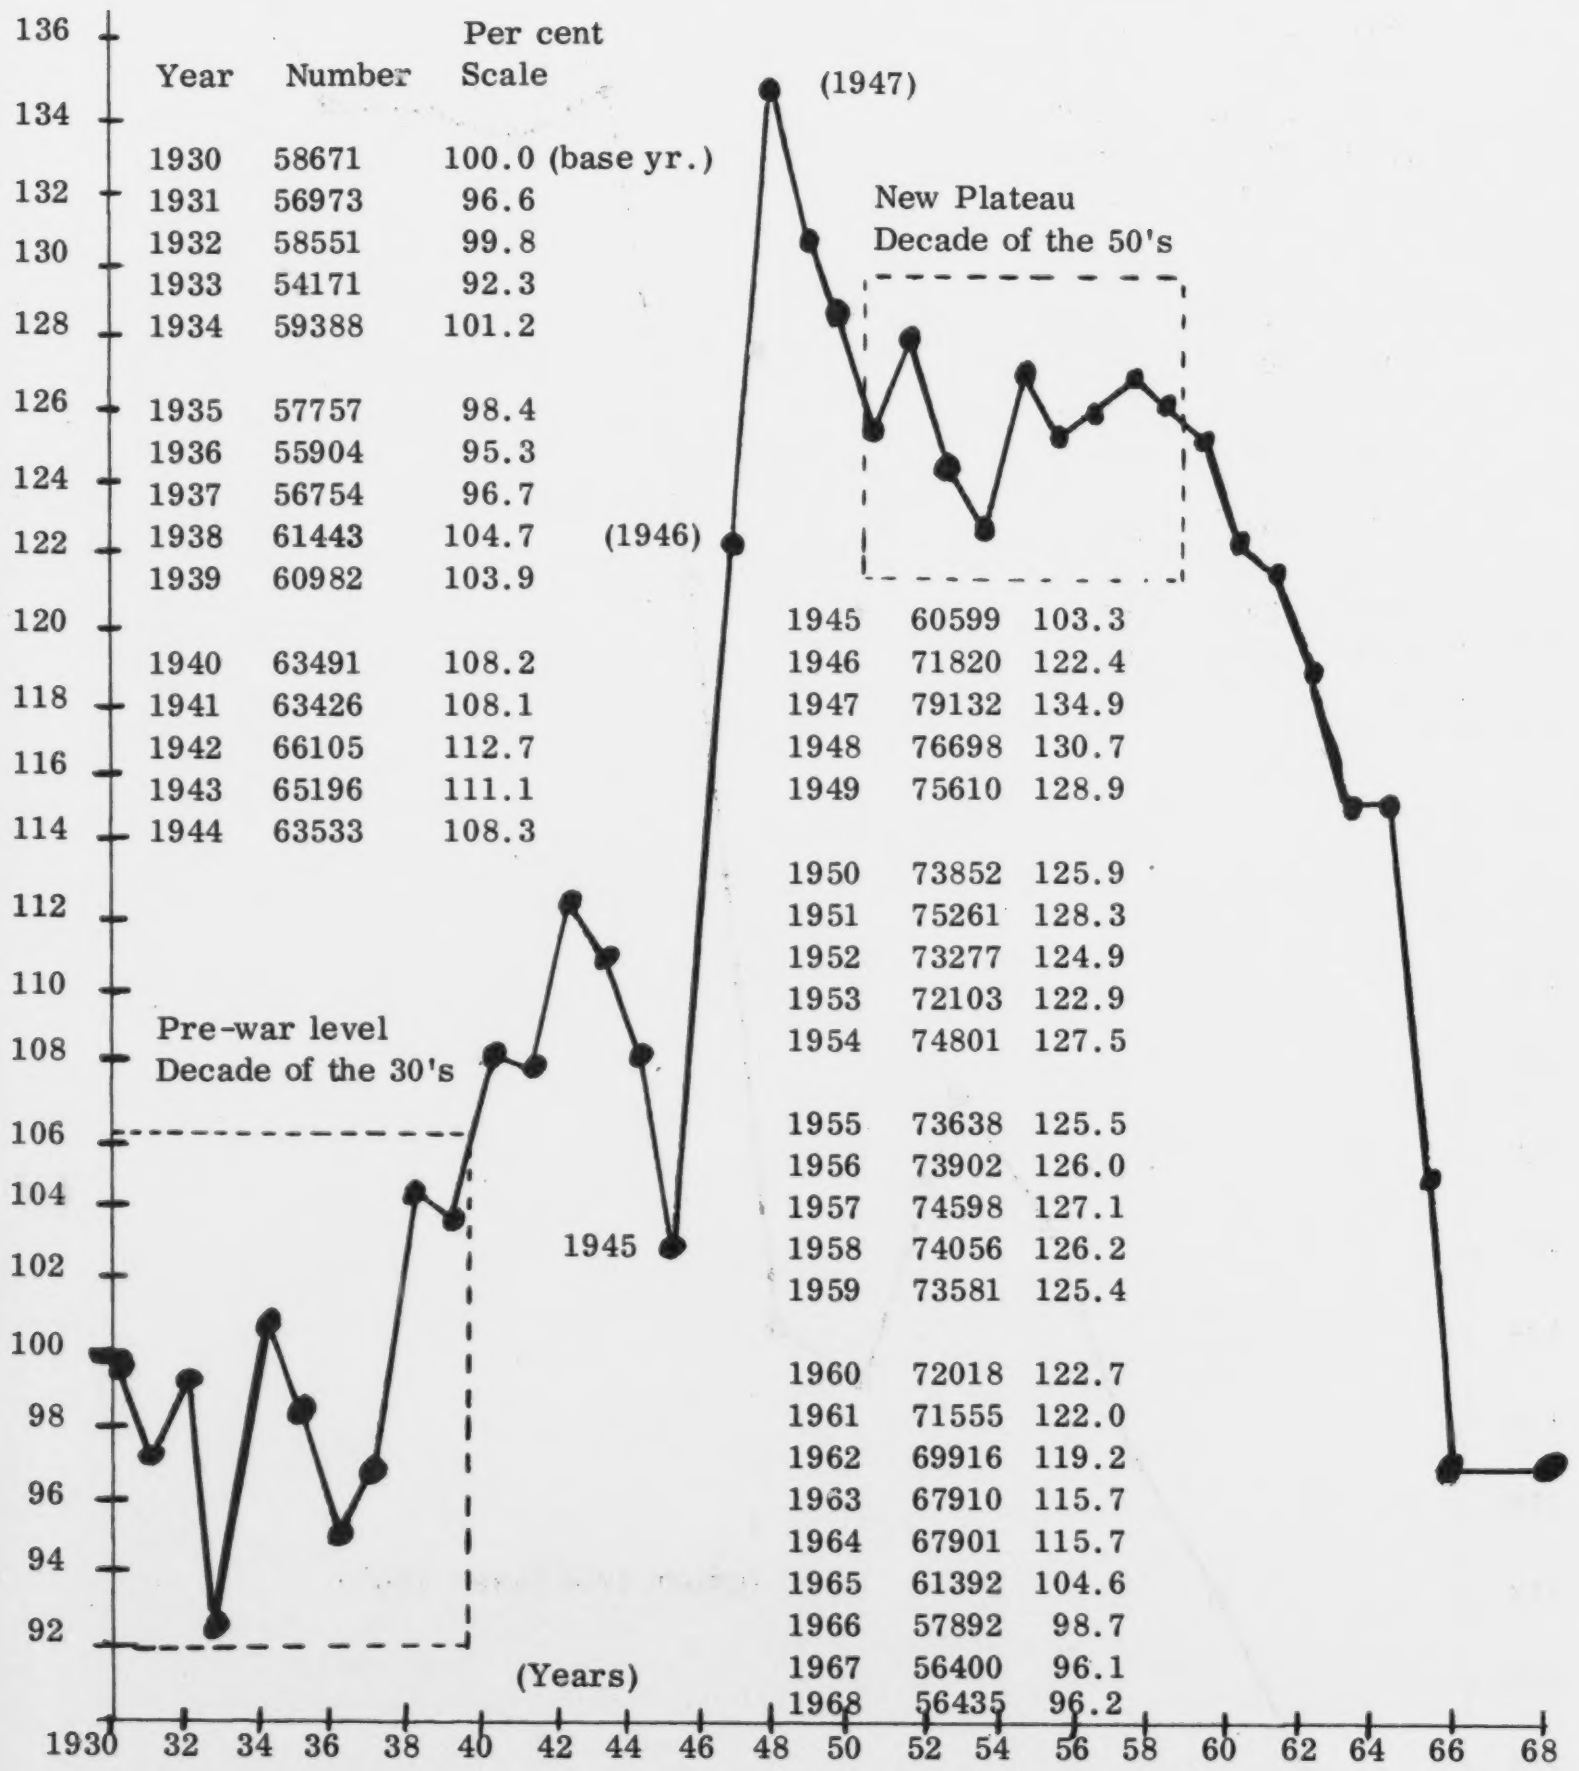
Reporting the Data

Charts 1 and 2 help to explain the rapid growth of secondary education in the post-World War II period. The Highlights section provides a brief summary of tabular data and comparisons with state and national norms.

Part I presents current data on holding power and graduates of public and non-public schools in Tables 1, 2, 3 and 4.

Trends and related data are shown in Part II. A special section of Part II deals with a comparison of the relationships of the number and size of public school graduating classes in 1959-60 with the current year, 1968-69. A comparable summary is provided for non-public high schools.

Chart 3. Kentucky Births, 1930-68



Year	Number	Per cent Scale
1930	58671	100.0 (base yr.)
1931	56973	96.6

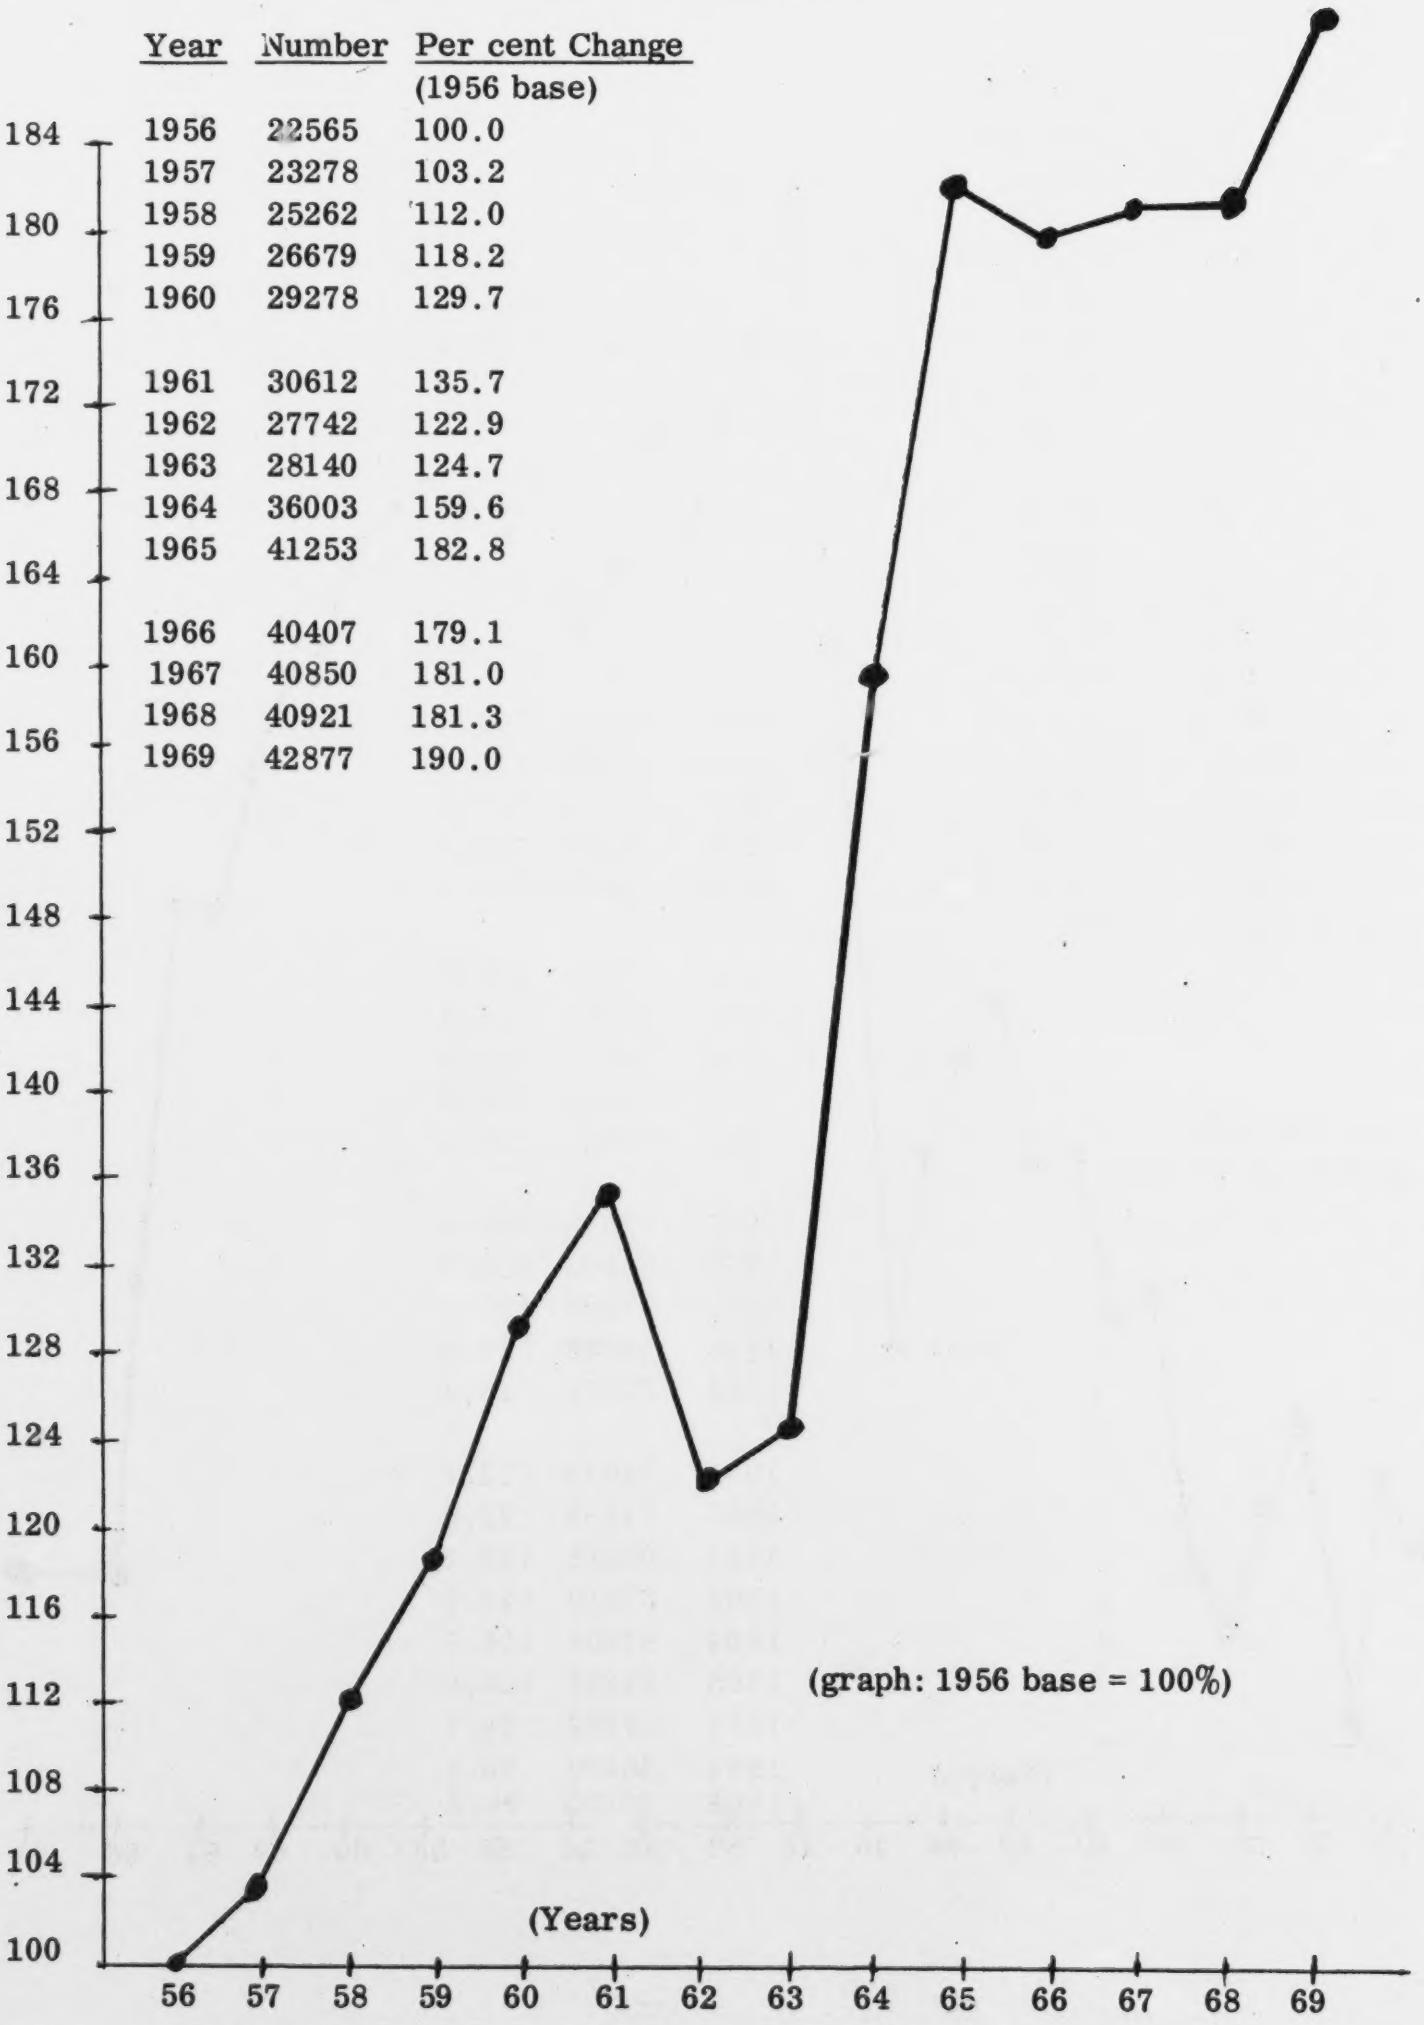
1967	40850	181.0
1968	40921	181.3
1969	42877	190.0



HIGHLIGHTS

In 1968-69, from the 303 complete public high schools, (including Regional and Federal), there were 38,197 graduates, or 68.1 per cent of the total number of 56,086 ninth grade enrollment in 1965-66. Of the total graduates, 19,233 or 50.4 per cent were boys and 18,964 or 49.6 per cent were girls.

From the 68 non-public high schools, there were 4,680 graduates or 80.0 per cent of the total number of 5,852 ninth grade enrollment in 1965-66. Of the total graduates, 2,278 or 48.7 per cent were boys and 2,402 or 51.3 per cent were girls.

From the total public and non-public high schools, there were 42,877 graduates or 69.2 per cent of the total number of 61,938 ninth grade pupils enrolled in 1965-66. Of the total graduates, 21,511 or 50.2 per cent were boys and 21,366 or 49.8 per cent were girls.

Of the graduates of public high schools, there were 16,504 or 43.2 per cent reported as enrolling in college or university. Of this number 8.753 or 53.0 per cent were boys and 7,751 or 47.0 per cent were girls.

There were 2,870 graduates, or 61.3 per cent of the total graduates of non-public high schools, reported enrolling in college or university. Of this number, 1,622 or 56.5 per cent were boys and 1,248 or 43.5 per cent were girls.

From all high schools, there were 19,374 graduates, or 45.2 per cent of the total number of 42,877 graduates, reported enrolling in college or university, Fall 1969.

Reported enrolling in some type of formal education program beyond the high school including college and university were: public high school graduates, 20,008 or 52.4 per cent of total public graduates; non-public high schools, 3,172 or per cent; and for all high schools, 23,180 or 54.1 per cent of total graduates.

The average survival rate per 1,000 ninth grade enrollment (1965-66) for all high schools was: tenth grade, 901; eleventh grade, 800; twelfth grade, 725; and graduates 692.

Sixty-nine and two-tenth (69.2) per cent of the total ninth grade enrollment four years earlier completed high school in 1968-69; an increase of 1.1 per cent from 1967-68. The approximate national average is 78 per cent.

For all Kentucky high schools, 45.2 per cent of all graduates in June, 1968 were reported enrolling in college or university in the Fall of 1969. The approximate national average is 55 per cent.

For all Kentucky high schools, 305 per 1,000 ninth grade pupils completed high school and enrolled in college or university. The approximate national average is 425 per 1,000.

Age of Public High School Graduates

Variability in age of public high school graduates has been significantly reduced as shown by the lower and upper extremes of the age distribution for 1969 as compared to the Class of 1959. Eighty per cent or more of the graduates in both 1959 and 1969 are almost equally divided between ages 17 and 18, (see Tables 13 and 14 in Appendix).

In 1959, there were 1,062 graduates or 4.6 per cent, age 16 or under; 659 or 5.7 per cent girls and 403 or 3.9 per cent boys. Boys and girls in independent districts tended to graduate at an earlier age than boys and girls in county districts.

In 1969, there were 296 graduates or 0.6 per cent, at age 16 or under; 188 girls, or 0.8 per cent; and 108 boys, or 0.4 per cent.

In 1959, the ratio of graduates 16 and under was 5.0 per cent county districts to 3.9 for independent districts. In 1969, the ratio changed to 0.9 per cent county districts to 0.5 for independent districts. What appears to be most significant in the changing age pattern is that the increased scholastic requirements and quality of programs in 1969 are of sufficient magnitude to challenge and hold all students through ages 17 or 18.

In 1959, 83.6 per cent of boys and 90.9 per cent of girls had completed high school at age 18 or under. In 1969, the comparable age percentages had increased to 85.8 per cent for boys, and 93.6 per cent for girls.

What about the graduates beyond age 18? In 1959, the number of boys at age 19, 20, and 21 and over, accounted for 12.3, 3.0, and 1.1 per cent respectively. For girls, these age groups accounted for 7.2, 1.2, and 0.7 per cent of graduates. Or, in summary 1,793, ir 16.4 per cent of boys were 19 years of age or over. For girls, 1,094 or 9.1 per cent were 19 years of age or over.

In 1969, the following percentages are noted in the over--18 age pattern with 9-year decrease shown in parenthesis:

	Boys		Girls		Totals	
Age 19	11.0	(-1.3%)	5.0	(-2.2%)	8.0	(-1.6%)
Age 20	2.5	(-0.5%)	1.0	(-0.2%)	1.7	(-0.4%)
Age 21	+ 0.6	(-0.5%)	0.4	(-0.3%)	0.5	(-0.4%)
Totals	14.1	(-2.3%)	6.4	(-2.7%)	10.2	(-2.4%)

The following approximate regional norms for ninth grade public schools completing high school, graduates to college, and ninth grade to college are reported for the eight regions, ESEA Title III.

Region	9th Grade/1,000 Completing High School	Graduates/1,000 to College	9th Grade/1,000 to College
I	723	485	350
II	702	365	257
III	713	348	271
IV-A	686	346	251
IV-B	690	412	309
V	662	340	231
VI	578	377	223
VII	655	381	261
Average*	676	382	269

*Derived data from Table 3

Changing Senior Class Size

In 1959-60, Kentucky public school districts operated 393 complete high schools with 112 schools or 28.5 per cent having graduating classes with less than 30 graduates, and 64 schools or 16.3 per cent having graduating classes of 100 or more members (Chart 8).

The 112 smaller schools produced 2,190 graduates or 8.5 per cent of all public high school graduates in 1960, the 64 larger schools accounted for 11,215 or 43.6 per cent of total graduates.

The smaller schools (112) had a holding power of 59.6 per cent, and reported 25.9 per cent of graduates enrolling in college; the larger schools (64) had a holding power of 61.4 per cent, and reported 40.0 per cent of graduates enrolling in college.

The average size of graduating classes for the 112 small schools was 19.6, the range from 3 to 29; the average size of graduating classes for the 64 large high schools was 175; the range 100 to 507.

In 1968-69, there were 303 complete public high schools with 22 schools, or 7.3 per cent having graduating classes with less than 30; and 142 schools, or 46.7 per cent, with graduating classes of 100 or more members (Chart 9).

The 22 small schools produced 503 graduates or 1.1 per cent of total graduates; the 142 large schools, 28,957 graduates or 75.8 per cent of all graduates.

In ten years, the 22 schools showed an increase in holding power from 59.6 to 62.3 per cent, and reported 172 or 34.2 per cent of their graduates enrolling in college as compared to 25.9 per cent in 1960.

The 142 large schools showed an increase in holding power from 61.4 to 68.9 per cent, and reported 12,831 or 44.3 per cent of their graduates enrolling in college as compared to 40.0 per cent in 1960 (Charts 8 and 9).

The average size of graduating class for the 22 schools with graduating classes of 29 or less was 20.0; the range from 8 to 28; the average size class for 142 large schools was 203.9, the range from 100 to 567.

In 1969, there were 60 non-public high schools with 18, or 30.0 per cent, having graduating classes of less than 30, and 15 or 25.0 per cent having graduating classes of 100 or more (Chart 10).

The 18 small schools accounted for 278 graduates, or 6.0 per cent of all graduates; the 15 large high schools produced 2,772 graduates, or 59.2 per cent.

PART I

HOLDING POWER AND GRADUATES

The three basic tables in Part I provide a summary of the number and whereabouts of graduates of all Kentucky public and non-public high schools, separately and combined, for the school year 1968-69.

The 61,938 ninth grade students in 1965-66 were enrolled in 441 complete and 7 incomplete public and non-public high schools. Of this total number of ninth grade students, 42,877 or 69.2 per cent were graduated from 421 complete high schools in 1969. The distribution of all Kentucky high schools by type of organization and control are shown in the following summary:

Type of Organization	Type of Control									
	County District		Independent District		Private and Parochial		State, Federal and Regional		Total	
	65-66	68-69	65-66	68-69	65-66	68-69	65-55	68-69	65-66	68-69
Grades 7-12	68	52	35	32	3	4	5	5	111	93
Grades 9-12	161	156	34	32	62	51	3	3	260	242
Grades 8-12	3	8	2	2	5	4	4	1	11	14
Grades 10-12	7	13	10	9	--	--	--	--	17	22
Grades 7-9	15	27	26	22	1	1	--	--	42	50
Incomplete	4	3	1	1	2	2	--	1	7	7
Total (65-66)	258	--	108	--	73	--	9	--	448	--

Source of data: State Bulletin Series, Kentucky High Schools, Vol. XXXIII (April, 1966), and Vol. XXXVI (July, 1969), Kentucky Department of Education.

Table 1 presents data by districts on 38,197 public school graduates of 294 high schools in county and independent districts and 9 special high schools.

Table 2 shows similar combined data by counties for 4,680 graduates of 60 non-public high schools.

Table 3 provides a summary by counties of all ninth grade enrollment (1965-66), all high school graduates, 1969, and total students enrolling in college or University in the Fall of 1969. A new feature of Table 3 is the numerical index of ninth grade pupils by counties is a product of per cent completing high school times per cent graduates entering college. The approximate national average for this index is seventy-eight per cent times fifty-five per cent or 429 per 1,000 ninth grade pupils enrolling in college four years later. The Kentucky average survival rate for ninth grade pupils to college is 305 per 1,000.

A concluding summary page combining data for Tables I and II shows percentage distribution by sex and type of school for all graduates.

For possible interest and use by regional study groups, combined data for public and non-public high schools are summarized by Title III ESEA regions in Table 4.

Graphic portrayal of the data arranged in a regional pattern is presented in Charts 5, 6, and 7.

PART II

TRENDS: HOLDING POWER AND RELATED DATA

The Brief trends data on holding power and graduates in this section, even of short duration, provide some benchmarks for appraising extent and rate of change in holding power in Kentucky. Though limited to a measure of quantity only, these data provide important indices to aid in program evaluation and as a base for further study.

Indication of Holding Power

As a general measure of holding power the tables and charts in this section provide a summary of the ten graduating classes since 1959 or two years after the full-financing of the Minimum Foundation Program in 1956-57. The majority of graduates of 1969 were enrolled in the third grade in the school year 1957-58.

Table 5 presents state-wide data by school districts on survival rates and whereabouts of graduates of public high schools for the ten year period, 1960-1969 inclusive.

Similar data for non-public high schools by counties are presented in Table 6.

Table 7 shows the combined data for all high schools and provides, in a limited way, a measure of the growth of the total secondary program (grades 9-12) in Kentucky.

Size of Graduating Classes

A new set of data on size of graduating classes of public high schools is introduced in the report. The first analysis of relationships of size of school, ninth grade enrollment, number of graduates, and graduates reported entering college was reported in 1961 for the class of 1960.[1] These data for public high schools are reproduced in Tables 8

1. Department of Education. Graduates Kentucky High Schools, 1960. (Frankfort, Ky.: State Department of Education). Educational Bulletin, Vol. XXIX, No. 5, 1961.

and 9 of this report are used as baseline data for measuring change on the same variables for the Class of 1969. Graphic portrayal of the data is provided in Chart 9.

Focus on the size of graduating classes as an indicator of the degree of breadth of program that might be expected in an average comprehensive high school was emphasized by Conant in his study of The American High School Today.[2] One characteristic of a modern comprehensive high school advanced in the Conant report of 1959 is that it should have a minimum of one hundred students in the graduating class in order to provide at a reasonable cost a basic program of education for all youth in its general attendance area.

Estimated data on Kentucky public high schools for 1957-58 as reported by Conant, final data for 1957-58, and current data for the Class of 1969 are shown below.

Year	Total No. 12th-Grade Students	12th Grade Students in Schools with 12th-Grade Enrollment of Less than 100		Total No. Schools Offering Diplomas	Schools Offering Diplomas with 12th-Grade Enrollment of Less than 100	
		Number	Per cent		Number	Per cent
1957-58*	22,860	14,835	65	423	386	91
1957-58**	23,551	15,187	64	413	365	88
1966-67	37,651	10,387	28	320	186	58
1968-69	40,129	9,037	23	303	158	52

*Estimate used in Conant report

**Final Data. Source: Kentucky Department of Education

2. James B. Conant. The American High School Today (New York: McGraw-Hill Book Co., 1959) p. 132.

From the above data, it will be observed that a dramatic reversal has taken place in the number of graduates from small and large high schools in a relatively short span of time. Merger and consolidation have enabled local school districts to reduce the number of schools offering diplomas from 423 schools (Conant report) in 1957-58 to 303 schools in 1968-69--a reduction of 120 schools or 28.4 per cent The number of high schools offering diplomas with 12th-grade enrollment less than 100 was reduced from 386 to 158--a reduction of 228 schools or 59.1 per cent--reflecting a combination of increased enrollment and consolidation of schools in the past nine years.

The data on relationships of size of school, ninth grade enrollment, and graduates to college for the non-public school classes of 1969 are shown in Table 10 and graphically portrayed by four broad graduation size groups in Chart 10.

County-Wide Summary Data

By way of a final summary, the three measures used throughout the report--holding power, graduates, and survival rate of ninth grade to college--for public and non-public schools are consolidated into two tables showing relative standings of counties as geographic units in a "standard nine" distribution. Holding power as measured by graduates per 1,000 ninth grade enrollment four years earlier is distributed by counties in Table 12 and graduates to college, Table 13.
